MANN-FILTER significantly expands European portfolio for passenger cars from Chinese manufacturers

Proven filter solutions from the Chinese market now available for workshops and dealers in Europe

Ludwigsburg, September 24, 2026 - The share of Chinese vehicle brands on Europe's roads is consistently growing. MANN-FILTER is responding to this development and is expanding its product portfolio to include numerous filter applications for vehicles from Chinese manufacturers.

The products have proven themselves in China for years and are now also available in Europe. MANN-FILTER is thus helping workshops and wholesalers to reliably meet the growing need for filters for Chinese vehicle models.

"Our 30 years of experience on the Chinese market and close cooperation with the local OEMs means we have advanced knowledge in this area," explains Eva-Maria Krieger, Team Leader Product Portfolio Management IAM at MANN+HUMMEL. "With this expertise, we are expanding our offering in Europe so that our customers can take advantage of the opportunities offered by the dynamically growing segment of Chinese vehicle brands."

Market coverage increases to over 82 percent

By incorporating numerous new filter applications, MANN-FILTER will increase the market coverage for passenger cars from Chinese manufacturers in Europe to over 82 percent by the end of 2026. The basis for this is the targeted expansion of the range of air, oil, fuel and cabin air filters. The expanded portfolio

initially includes 242 vehicle applications for 133 models from more than 20 Chinese manufacturers.

This represents another important step towards the long-term goal of 95 percent market coverage. MANN-FILTER will consistently continue to expand its portfolio and thus cover further vehicle models.

In the independent European aftermarket, workshops thus benefit from a reliable supply of high-quality filters, while wholesalers can broaden their range in a targeted manner for a rapidly growing vehicle segment.

Proven MANN-FILTER quality for Chinese vehicle models

The filters meet the high quality requirements of MANN-FILTER and offer the usual product quality. Established production processes and the high quality standards that MANN-FILTER places on its products worldwide are applied.
